

Event details

2010 is the first year we have supplied temporary structures to the Abu Dhabi Yacht Show ADYS. This is the show's second year and is the only annual exhibition dedicated to the super yacht and mega yacht sectors in the Middle East.

The requirement

Temporary structures to make up 3 exhibition areas and a hospitality suite at the Yas Marina Circuit.

Structures we supplied

Approximately 7,000sqm of structures were supplied, consisting of:

Exhibition structures – 3 x Giant Pavilions with Apex roof
Hospitality structure – An Absolute Pavilion with Apex roof

The challenge

This job provided us with plenty of challenges from the start! First of all confirmation of this job didn't come in until Christmas Eve, as shipments take 4 weeks to get to Abu Dhabi we had to work very quickly to establish exactly what the client wanted so that the equipment could be shipped and arrive in time for the build to start, which was 8th February.

The initial plan was to build the structures on floating pontoons actually on the Yas Marina water however the client did not receive permission to do this therefore a new site had to be found and new plans drawn up. The approval for the actual site of the show, the Yas Marina Circuit, was not confirmed until the day the build was due to start.

The outcome

We believe that our flexible attitude and close working relationship with our client ensured, despite the short timescales and amends to the plans, that this project was delivered on time and to our exacting standards. This is a real wow factor event and we think our structures provide the perfect backdrop.
