

## Event details

We have supplied temporary structures for Goodwood Road Racing since 1998 and The Festival of Speed event since conception in 2003.

## The requirement

For the Goodwood Festival of Speed 2009 they wanted:

- Drivers club
- Media centre
- Hill hospitality suite

## Structures we supplied

Approximately 3,500sqm of structures were supplied, consisting of:

Drivers club - 7 structures, built on scaffold to create different zones

Media centre - A Premier Pavilion, built on scaffold and incorporating a twin peaked roof

Hill hospitality suite - A Premier Pavilion, divided up to create individual chalets

## The challenge

Our relationship with Goodwood and experience of their site enabled the build to go ahead to plan. The biggest challenge we face with this project is to provide new concepts year on year. It is always in the forefront of our mind to give new and returning visitors something exciting to look at.

## The outcome

The GL events Owen Brown structures provided the perfect backdrop to an impressive festival weekend.

Another successful event completed for Goodwood!

*In 2008 we supplied our brand new Eclipse structure for the Moss hospitality suite. It was a 24m x 85m structure with a 4m wide inset balcony, elevated on scaffolding to allow for a perfect view of the track below. Unfortunately due to reduced hospitality requirements the second hospitality suite wasn't required in 2009.*
